For 10 years we've based our success on a foundation of 2 key principles

1. Offer the best carrier-class Internet services available anywhere...

- With multiple Tier-one backbone connections
- By maintaining superior subscriber-to-bandwidth density ratios
- Offering great secondary services like email, hosting, and co-location

2. Provide surprising service. Call our office to find...

- A friendly person answering your call
- Knowledgeable technical support ready to help
- Relationships where clients feel more like partners
- Engineers experienced in diverse network technologies

Our mission...

is to provide superior Internet resources to commercial and residential clients alike.

We're committed...

to providing reliable innovative solutions, relevant to today's environment, with easy access to knowledgeable people who care.
